

End your search for EDI transaction information with our

# Document Tracking Solution For GIS™ (SI™)

## Advance, Empower and Streamline Your B2B Infrastructure with Adept's Document Tracking Solution

Are you spending too much time tracking down the status of your EAI or B2B transactions (such as EDI, ebXML, proprietary application formats, etc) within GIS (SI)? Does your GIS (SI) architecture provide you the level of tracking and reporting that your business demands? Is your IT Department taking reactive measures building manually intensive processes to support the information and reporting needs of your GIS (SI) infrastructure? The need to constantly search your systems for the status of your business document data ends here.

Our team of expert engineers has developed the premier GIS (SI) Document Tracking solution. Our prebuilt solution will provide your business with instant, real time information to the state of your transactions within GIS (SI). With Document Tracking, you now have the ability to reduce your IT support time, offer outbound visibility to your organization or trading partners on the status of documents, and give ownership of critical data to the business.
